Summary

With more than 2 years of work experience as a front-end developer using React.js and Next.js, as well as familiarity with Node.js for the back-end and relative mastery of SQL and NoSQL databases and complete mastery of the popular Next.js framework. Creating complex platforms such as crm and cms site builders as well as implementing modern designs and developing 3D websites are my key capabilities.

Work Experience

Afrand Tejarat Rasa

Front–end Developer
July 2024 - October 2024

Front–end development of a permit acquisition system using React.js and Next.js, with customized component development using Tailwind. GraphQL was also used for server communication.

Projects

Portfolio

Description:
On my website, you can find all the information and project samples, as well as my skills and contact details.
Address: **https://mooudmohammadi.vercel.app/en**

Project Management system (Centralflow)

Description:
This system manages project tasks, resources, and schedules to enhance development efficiency and project management. It was designed to address the needs of micro and macro businesses.
Address: **https://centralflow.ir/en**

NFT & Crypto Platform (Quxland)

Description:
This project was developed in collaboration with a backend developer and will soon be launched in production. Additionally, it challenged and enhanced my skills in web3 and 3D development.
